### Available in

- 25kg bags

### Coverage

- 16-18m<sup>2</sup> per bag

## MPFinish

### Purpose designed for spray application

#### What makes Knauf MPFinish so revolutionary?

Knauf MPFinish makes the spray application of finish plasters possible. Knauf purpose-designed MPFinish in conjunction with leading spray machine manufacturers, who have brought out new machines to suit its characteristics. MPFinish mixes and sprays perfectly, without causing wear to the machine.

The real benefits come when you use it. The massive increase in productivity means the client can enjoy a quality plaster finish in timescales previously reserved for drywall. The plasterer doesn't have to physically mix or lift product onto the wall, and ceilings can be plastered without needing scaffolding. The Knauf name is your guarantee of unrivalled quality, service and support.

#### Case study

Two 3 man gangs plastering identical ceilings, starting at 8.00am and finishing at 3.00pm. One gang applied 3 gauges of 30m<sup>2</sup> using a traditional hand application method. The other gang, spray applying Knauf MPFinish, applied and finished 220m<sup>2</sup> in the same time.

MPFinish vs Traditional Application
