

Product Range

Futurepanel - The Carbon Neutral Plasterboard
Knauf Drywall systems A-rated in Green Guide
Laminate Range provides instant energy saving
Our plasterboard is easily recyclable
Aquapanel prevents tile failures and associated waste from damaged materials

Design Detailing

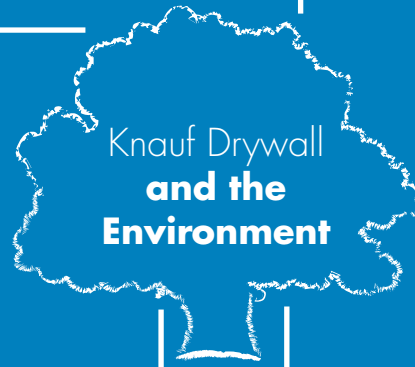

Project Team actively designs-out waste and optimise systems and logistics
Enviro Door Jamb detail saving thousands of m² of waste plasterboard on commercial projects

Transportation Efficiency

Stobart fleet has the latest Mercedes Actros trucks
Full loads maximise efficiency
Our trucks are used to deliver other goods from area of drop to ensure the maximum number of journeys are full
Alternative transport methods such as barges for the Olympic Delivery Authority

Renewable Energy

2MW Wind Turbine project underway at Sittingbourne
Combined Heat and Power being assessed at Immingham

Factory Recycling

Paper and cardboard pulped - back into production
Waste plastics remelted - into damp proof courses
Scrap timber turned into chippings for gardens
Scrap metal recycled locally
Used oil collected for recycling
Overalls managed by single company to minimise water and energy usage
Sittingbourne factory zero-emitting to landfill

Gypsum Waste Recycling

Collect from Housebuilders, Commercial sites, Merchants
Bags, Skips, Ro-Ro and Wheeliebins.
Gypsum and paper put back into production process
50% reduction of waste gypsum by 2012 - Ashdown agreement

Factory Efficiency

Fully insulated with energy efficient lighting throughout
Heat exchangers from driers save approximately 10% of plant's energy requirements
Sophisticated Energy Management Software optimises energy usage
Working with Carbon Trust on future targets
